# Osman Gormus

+1 (415) 827-2170 · osman@gorm.us

## Profile

Senior full-stack developer specialized in web projects with proven expertise spanning over two decades.
Always meticulous and thought-through at any given stage of the project.
Very comfortable with problem-solving, and troubleshooting.
Always aiming to find the best tools and technologies to fit the budget and time frame.
Quite comfortable on both front-end and back-end development, and implementing 3rd-party software (API, SaaS).
Experienced as a solo developer and also as a team member.

## Expertise

- Custom Drupal development since v4.7 including modules, themes, and distributions.
- Building multi-site solutions with shared or private content across the sites.
- Drupal Commerce implementation.
- 3rd-party software (API, SaaS) integration with Drupal.
- Building RESTful web services.
- Importing/exporting content between Drupal websites.
- Prefer developing in continuous integration environment.
- Training team members and clients.
- Technical consulting during client meetings.
- Installing, configuring and managing web and database servers on Windows, Linux, and MacOS.
- Optimizing markup for SEO using Structured Data, Schema.org
